Report Week 1-

All tutorials were followed and all errors were solved

Changes made-
- A new location India is added along with its Flag
- Location was initially without a box and now a proper box was added with background color.
- Location did not have country flag initially which is added now
- The edit location was a TextButton which is now changed to Elevated Button with proper background and text color
- A different default home screen image was added for day.
- The location of all everything was changed(edit location made to bottom and location box and time were changed slightly).
- All Text colors were changed and made bold wherever I felt was required.
- Font size was adjusted to enhance readability.
